AMENDMENTS

In the Claims:

1. (Original) A system, comprising:
 - a) an aircraft;
 - b) a maintenance manual for the aircraft, stored
in non-human-readable form aboard the aircraft; and
 - c) means for displaying the maintenance manual to
5 a human.
2. (Original) A system, comprising:
 - a) an aircraft;
 - b) a first maintenance manual for the aircraft,
10 stored in computer-readable form aboard the aircraft; and
 - c) means for displaying the maintenance manual to
a human.
3. (Original) System according to claims 2, and
15 further comprising:
 - d) a ground-based computer; and
 - e) a second maintenance manual for the aircraft,
stored in computer-readable form in the ground-based computer.
- 20 4. (Original) System according to claim 3, and
further comprising:
 - f) means for causing changes made in the second
maintenance manual to be replicated in the first maintenance
manual.

5. (Original) A system, comprising:
a) an aircraft;
b) computer-readable memory, carried by the
aircraft, which stores content containing at least one
5 document in the following group;
i) maintenance manual for the aircraft;
ii) maintenance log of the aircraft;
iii) configuration log of the aircraft; and
c) means for enabling a crew member of the
10 aircraft to read the content.

6. (Original) System according to claim 5,
wherein the group further contains
iv) pilot logbooks.
15

7. (Original) System according to claim 6,
wherein the group further contains
v) task cards.

8. (Original) System according to claim 7, and
further comprising:
d) means for receiving data from a remote source,
and modifying the content, using the data.
20

9. (Original) System according to claim 7, and
further comprising:
d) means for updating the content, in response to
messages received from an external source.

10. (Original) A method, comprising:
- a) onboard an aircraft, maintaining a maintenance manual for the aircraft in computer-readable form; and
 - b) at intervals, modifying the manual.

11. (Original) Method according to claim 10, and further comprising:

- c) onboard the aircraft, maintaining a maintenance log of the aircraft in computer-readable form.

12. (Original) Method according to claim 11, and further comprising:

- d) onboard the aircraft, maintaining a configuration log of the aircraft, in computer-readable form.

13. (Original) A method, comprising the following steps:

- a) maintaining, onboard an aircraft, a first set of documents in computer-readable form, said first set of documents comprising one or more of the following:
 - i) a maintenance manual for the aircraft;
 - ii) a maintenance log of the aircraft;
 - iii) a configuration log of the aircraft; and
 - iv) pilot logbooks;
- b) causing alterations to occur in the first set;
- c) maintaining, at an earth-based site, a second set of documents in computer-readable form, said second set of documents comprising one or more of the following:
 - i) a maintenance manual for the aircraft;
 - ii) a maintenance log of the aircraft;
 - iii) a configuration log of the aircraft; and
 - iv) pilot logbooks; and
- d) replicating the alterations into the second set of documents.
